

AADESH KUMAR

Software Engineer | Full-Stack & AI Automation

Haridwar, India | +91 9760655299 | aadeshk306@gmail.com | LinkedIn | GitHub | Portfolio

TECHNICAL SKILLS

Full-stack: TypeScript, JavaScript, React, Next.js, Node.js, Express, REST APIs, SQL, PostgreSQL, MongoDB, Prisma, Redis

AI & automation: n8n, AI agents, RAG, vector databases, OpenAI and Gemini APIs, GPT and Llama models, webhooks

Testing & delivery: Vitest, Jest, Supertest, K6, Grafana, Git, GitHub Actions, Vercel, Cloudflare

EXPERIENCE

Full-Stack Engineer; later also AI & Automations Engineer, CIS IT Solutions Apr 2025 - Present

- Built **complete frontends** for a ticketing SaaS, an art marketplace and Nakshatra astrology app; contributed backend services and API integrations; Nakshatra is in production.
- Built a **customer-review platform** across frontend and backend, from design through implementation.
- Rebuilt a ticketing SaaS backend for **multi-tenancy under senior mentorship** and used K6 with Grafana to identify and address performance bottlenecks.
- Extended an inherited **RAG and vector database chat agent** in an AI-enabled SaaS ticketing platform to create tickets, return document files and draft emails.
- Built an **API-powered astrology chat agent** and separate reporting agent using rules, RAG, APIs and templates; built an **art marketplace sales agent** for product, cart, order and support workflows.
- Built **frontends, backends and n8n blog agents** for four company web projects; managed n8n workflows and a Vercel test branch.
- Integrated **Agora** for video consultations and **Razorpay** for payments; delivered **Socket.io** real-time features and added backend tests with Vitest, Jest and Supertest.

Junior Frontend Developer, Perky Solutions

Dec 2024 - Mar 2025

- Built dashboards and data tables for **10,000+ rows** with sorting, filtering and pagination.
- Reduced development time by **20%** by standardizing reusable UI components and patterns.

Market Analysis & Next.js Development Intern, Lostronaut

Aug 2024 - Oct 2024

- Conducted market research and translated findings into requirements for a **business analytics dashboard**.
- Built the dashboard with **Next.js, TypeScript, Prisma, MongoDB and NextAuth**, including access control, search, charts and uploads.

INDEPENDENT PERSONAL PROJECTS

Japp Tattva | japptattva.com

Live

- Built a **Next.js storefront, admin backend and headless blog** in one monorepo using PostgreSQL, Prisma, Redis, NextAuth and Razorpay.
- Built a **109-node n8n pipeline** for research, writing, SEO and publishing with GPT, Gemini and Llama fallback.
- In 28 days, Search Console recorded **1.83K** Web search impressions (17 clicks, 0.9% CTR, average position 10.5); a separate Generative AI features report recorded **201 impressions**.

Decoded Person | decodedperson.com

Live

- Built a Next.js and PostgreSQL platform ingesting **20 RSS sources** with LLM triage, fact validation and database deduplication.
- Automated publishing to YouTube, Instagram, LinkedIn and Discord; the site recorded **522 impressions** and **average Google position 8.1** in its first week.

AI Script-to-Video Engine | YouTube channel

Local demo

- Built a locally demonstrable **Next.js script-to-video engine** using OpenAI for scripting, local Hugging Face models for **image generation**, still-image video assembly, AI scene direction and sound-effect suggestions.

EDUCATION

B.Tech, Computer Science Engineering

Doon Institute of Engineering and Technology, Rishikesh

2021 - 2025
